National List of Active EPA-Registered Foreign and Domestic Pesticide and/or Device-Producing Establishments

EPA assigns a unique number to each establishment that produces any pesticide, active ingredient or device. This webpage displays the most up-to-date list of active pesticide establishments that have registered with EPA for a pesticide establishment number. The Federal Insecticide Fungicide and Rodenticide Act (FIFRA) requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. Please note that an EPA Establishment number appearing on a product label does not signify that the pesticide or device is in compliance with FIFRA. Rather, an EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced.

The information that is included in the list is:

- EPA establishment number
- Establishment name
- Establishment physical site address, state, zip-code, county and EPA region
- Establishment Office mailing addresses
- Company name
- Company headquarters physical site address
- Company headquarters mailing addresses
